A large screen TV designed for the ultimate cinematic and audio-visual experience in a striking and iconic design combined with a magically choreographed movement.

**50 words:**

A large screen TV designed for the ultimate cinematic and audio-visual experience in a striking and iconic design. A magically choreographed movement gives the freedom to reduce the visual presence of a large

black TV screen. Beovision Harmony is managed by one remote philosophy.

**100 words:**

A large screen TV designed for the ultimate cinematic and audio-visual experience in a striking and iconic design. A magically choreographed movement gives the freedom to reduce the visual presence of a large black TV screen. Beovision Harmony is managed by one remote philosophy. The cinematic sound performance is delivered through a 3-channel speaker system with great speech intelligibility and power. The integrated audio streaming technologies Chromecast built-in, Apple AirPlay 2 and Bluetooth make for an amazing multiroom enabled music system in its own right.

## KEY SELLING POINTS

**Exceptional Bang & Olufsen sound paired with the best OLED picture performance**

The iconic Bang & Olufsen cinematic sound performance is delivered through a 3- channel speaker system with great speech intelligibility and power. Paired with this outstanding sound, is LG OLED technology, acknowledged for its ability to create absolute black and stunning contrasts, which make for an immersive cinematic experience that is second to none.

**Striking design combined with magically choreographed movement**

With the new large screen Beovision Harmony concept, Bang & Olufsen has reduced the visual presence of the TV. When in standby or audio mode, the TV screen is positioned close to the floor and partly covered by the speaker system, making the TV screen less dominant in the room. When switched on, Beovision Harmony unfolds and shows off its full potential in a magical movement.

**Combining wood, fabric and aluminium with meticulous attention to details**

The speaker cover system "complements" the dark TV screen "with its" domesticated and furniture-like materials which gives a warm appearance with elegant details. The usage of natural wood or textured fabric combined with precise aluminium leads to a perfect cohesion between Beovision Harmony and Beolab speakers.

**Ease-of-use at its heart**

The Beoremove One provides one-touch access to the Bang & Olufsen experience. This, combined LG's webOS SmartTV function, ensures convenience in the daily use of your complete A/V setup. You can also make a 'favourite' with the OneTouch Button and get direct access to favorite TV channel or content app.

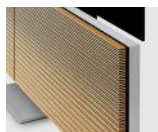

**Built for multiroom music experiences**

Uncompromised sound quality with Chromecast built-in and Apple AirPlay 2. Bluetooth for quick and easy streaming throughout your home.
